Summary

Fourth-year Information Technology student at International University (IU), VNU-HCM, seeking a QA Tester Internship. Experienced in designing and running functional, integration and regression tests on a multi-component backend system during a 3-month internship, with a developer's understanding of APIs, databases and Python scripting. Detail-oriented, strong English documentation skills, and eager to work in an Agile team.

Professional Experience

06/2026 – 09/2026

HPT Vietnam Corporation, *Backend Developer Intern*

Zabbix Agent Version Management & Auto-Update System

- Built a FastAPI service to detect Zabbix agent versions and trigger manual/scheduled updates across Linux hosts via Ansible.
- Implemented post-update verification, automatic rollback and audit logging for every update job.
- Added role-based authorization to protect update operations, and a live status view for running jobs.
- Wrote Python test scripts and executed functional/integration test scenarios across 8 feature areas in a lab environment.

Projects

10/2026 – Present

ZYX – Cross-platform Music Streaming App,

React Native (Expo) · TypeScript · Supabase (PostgreSQL) · SQLite · GitHub Actions · Sentry

github.com/henrywizzrd/zyx

Personal iOS/Android music app, built with an AI-assisted workflow .

• Designed a Supabase (PostgreSQL) cloud backup with Row-Level Security so each user can only access their own library; restore merges with local data instead of overwriting.

• Built a local SQLite data layer (play history, listening stats, downloads) with schema migrations and import/export.

• Integrated multiple third-party music and lyrics APIs with ordered fallbacks, timeouts and signed (HMAC-SHA512) requests.

• Implemented offline mode: network detection, downloaded-only library and playback queue.

• Set up CI/CD with GitHub Actions: Android/iOS builds, over-the-air updates, and crash reporting with Sentry (source maps uploaded from CI, secrets kept in GitHub Secrets).

Task Management System, *Java · JavaFX · MySQL · JDBC · ERD Design*

A desktop task management application built independently with Java and JavaFX. Designed the full relational database schema in MySQL (3NF normalized, 6 tables) including hierarchical task structures via self-referencing foreign keys. Implemented role-based access control for Admin, Manager, and Member roles, and automated audit logging using MySQL Triggers to capture all task status changes with timestamps.

LibraryHub, *Python · FastAPI · PostgreSQL · SQLAlchemy · Redis · JWT*
In Progress A full-stack digital library web application built with FastAPI and PostgreSQL. Implemented JWT-based authentication with access/refresh tokens, RESTful API for book management, loan tracking with automatic overdue fee calculation, review system, and in-app notification scheduling using APScheduler. Designed relational schema with SQLAlchemy ORM and Alembic migrations.

Education

09/2021 – 2027
Ho Chi Minh City, Vietnam

Bachelor of Information Technology (In Progress),
International University (IU) — Vietnam National University HCMC

- Medium of Instruction: 100% taught in English. Possess strong proficiency in reading technical documentation, listening, and communicating effectively in professional and specialized English.
- Relevant Coursework: Web Application Development, Database Management, Computer Networks, Object-Oriented Programming, Statistics & Probability.

Skills

Testing & QA
Postman (API testing, collections, test scripts), functional, integration and regression testing, test case design, bug reporting, Maestro (E2E UI testing), Sentry, GitHub Actions CI/CD

JavaScript
HTML/CSS, TypeScript

AI Tools
Claude API, Gemini API, Open Claw, Antigravity, Codex, prompt engineering

Python
FastAPI, OOP, scripting

SQL
MySQL, PostgreSQL, SQLite, database design, queries.

DevOps & Infrastructure
Ansible, Docker, Linux, Zabbix API, REST API design

Java
Spring Boot, Spring Security, Spring Data JPA, JavaFX, JDBC

Tools
Git, GitHub, VS Code, NetBeans, Tomcat

Mobile & Cloud
React Native (Expo), Supabase

Languages

Vietnamese

English
IELTS 5.5; studied 100% in English, comfortable reading technical documentation
